

Night Service Message Configuration and Retrieval

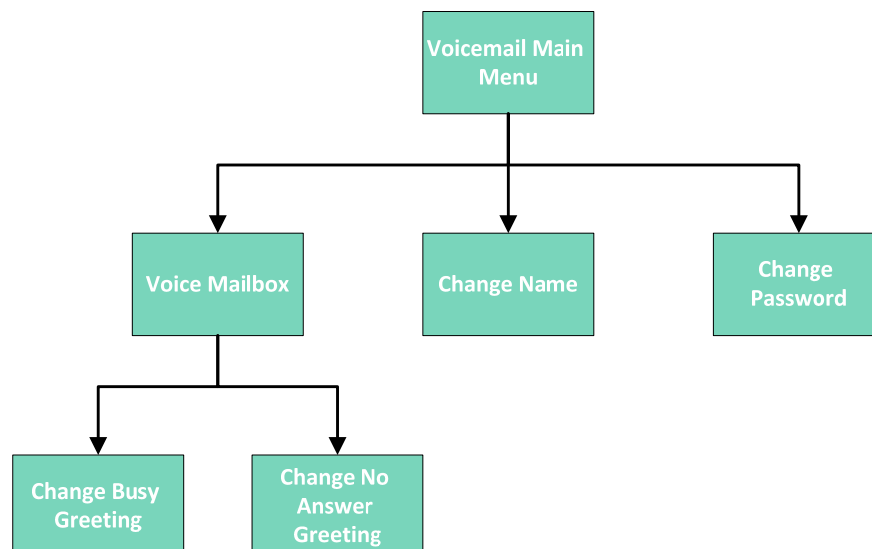

Message Configuration

Setting up voicemail for the first time

1. From any phone in the business press New Call followed by 5555, then Send
2. As soon as the automated message starts interrupt it with the * key
3. You will now be prompted for your mailbox number. This is a 4 digit number given to you by your Service Provider. Enter it now followed by the # key
4. You will be asked for your temporary password which is 0000 followed by the # key
5. You will now be asked to change your temporary password
6. You will now be asked to record your name – this is not the greeting which will be played to inbound callers.
7. From the main Menu press 1 for Mailbox Features
8. You will now be prompted to record a greeting. Your No Answer greeting will be played to callers when the office is closed

Changing your Voicemail greeting

1. Dial into Voicemail by pressing New Call followed by 5555, then Send
2. Enter your password followed by the # key when prompted
3. You are now at the Main Menu
4. Press 1 for Voice Mailbox
5. Press 2 to change your Busy Greeting
6. Press 3 to change your No Answer Greeting
7. Follow prompts for playback and to save

Message Retrieval

1. When you receive a voice message the red message lamp will alight on you telephone [if this feature is supported by the handset].
2. Dial into Voicemail by pressing the "Message" Button if available or New Call, followed by 5555, then Send
3. Enter your password followed by the # key when prompted
4. You will now told how many messages you have and Press 1 to hear them
5. At the end of each message you will be prompted to Save or Delete the message

Note: An easier way to retrieve messages is to have them sent to your email inbox. Provided you have a multimedia PC, you can simply play the messages back as audio files. This feature can be configured through Unity desktop under "Settings" or contact your Service Provider
